

STAKING \$SFIT

Transform Your Crypto Holdings into Passive Income with Our Staking Program

ENSE **S4F** **IT**

STAKING OVERVIEW

The best way to use your \$SFIT tokens is by staking them for a passive future income, especially now since they generate higher interest rates for tokens holders!

When you stake your coins, you unlock their value and get access to certain features within the platform. Your tokens are still in your possession when you stake them, but you also get interest for them and you're free to unstake after their full maturity or in advance (early withdrawal) by giving up on the accumulated benefits to date.

Sense4FIT Staking Program can be thought of as a high-yield decentralized savings account that rewards you for holding onto your \$SFIT tokens. Essentially, the longer you stake, the more potential rewards you'll receive.
